PCIC STYLE QUICK REFERENCE

Colour palette and typography guidance

1 Official Colours

PCIC dark blue - logo colour
#003F5E - RGB 0, 63, 94

PCIC medium blue
#205768 - RGB 32, 87, 104

PCIC light blue - logo colour
#6D9FB9 - RGB 109, 159, 185

PCIC dark green
#2B6733 - RGB 43, 103, 51

PCIC medium green - logo colour
#60BA46 - RGB 96, 186, 70

PCIC light green
#BBDC9B - RGB 187, 220, 155

PCIC grey-green
#C1CDA4 - RGB 193, 205, 164

PCIC light-grey green
#E4EADA - RGB 228, 234, 218

2 Typography

TITLES
Myriad Pro Bold Condensed - ALL CAPS

Subtitles
Myriad Pro Bold

Main/body text
Myriad Pro Regular

3 General Guidance

- Use the official PCIC palette consistently across communications.
- Dark blue is the primary text colour in branded materials.
- Medium green works well for section headings and emphasis.
- Light green and grey-green tones work well for callout areas.
- Scientific figures may use additional colours where needed for clarity.

Myriad Pro licensing note

Myriad Pro is an Adobe typeface and may be subject to licence restrictions.
Standard desktop/Adobe Fonts licensing generally permits use in printed and exported documents, including PDFs, but does not permit redistribution of the font files themselves or embedding the font directly in software applications.
Confirm the applicable Adobe or font licence before distributing font files or using Myriad Pro outside normal document-production workflows.

WEB APPLICATION CONVENTIONS

Recommended PCIC interface conventions derived from the official brand palette

Comp Support web design-system conventions

These provide consistent application defaults while allowing scientific and map colours to remain context dependent.

1 Interface Colour Use

Primary action
#003F5E - PCIC dark blue

Primary hover
#205768 - PCIC medium blue

Accent
#6D9FB9 - PCIC light blue

Success
#2B6733 - PCIC dark green

Warning
#B36B00 - UI semantic colour

Danger
#C94A38 - UI semantic colour

Page background
#F5F5F5 - Neutral

Surface
#FFFFFF - Neutral

Muted surface
#F0F0F0 - Neutral

Hover surface
#E8F4F8 - Neutral

Text
#333333 - Neutral

Muted text
#666666 - Neutral

2 Scientific Variable Accents

Shared visualization defaults; use additional colours where required for scientific clarity.

Precipitation
#1976A8

Temperature
#C94A38

Snow
#5B84B1

Flow
#39796B

Evaporation
#4F7F47

Glacier
#477F9D

Soil
#8A6541

3 Web Application Typography

Existing PCIC web applications use system, Arial, or generic sans-serif typefaces rather than Myriad Pro.

Interface: Shared system sans-serif stack for controls, tables, dialogs, navigation, charts, and body UI.

Monospace: System monospace stack for code, identifiers, coordinates, logs, and other fixed-width technical content.

WEB TYPOGRAPHY DEFINITIONS

Shared interface font-family definitions used by PCIC web applications

How to read these definitions

Each font stack is an ordered list of fallbacks. The browser uses the first available font.
Publication typography remains Myriad Pro; web interface typography uses system fonts.

1 Shared Font Families

Interface font

`--pcic-font-sans`

Normal web application text: controls, tables, dialogs, navigation, labels, charts, and body UI.

```
system-ui, -apple-system, BlinkMacSystemFont, "Segoe UI", Roboto, Helvetica, Arial,
sans-serif
```

Monospace font

`--pcic-font-mono`

Fixed-width technical content such as code, identifiers, coordinates, logs, or similar values.

```
ui-monospace, SFMono-Regular, Consolas, "Liberation Mono", monospace
```

2 Usage Summary

Reports, primers, presentations, and other branded communications: follow the Myriad Pro hierarchy on page 1.

Web applications: use the shared system sans-serif and monospace definitions above.
